

ELECTRIC BOILERS VIQTIS

ENAMELED STEEL

 VIQTIS

The VIQTIS electric boiler from the JSM series is a modern appliance designed for energy efficiency and longevity. With a 2 kW heater, it provides fast heating of water, making it ideal for medium-sized households and small businesses.

ENAMELLED STEEL

MOST IMPORTANT FEATURES

Energy class C

Top quality enameled steel
Confirmed by numerous certificates.

2kw heater

Polish producer, offering reliable service and comprehensive technical support.

The boiler has a thermostat located on the bottom of the unit, which allows you to precisely set the water temperature with an easy-to-use dial. The adjustment range is from 30°C to 75°C, allowing you to quickly adjust the temperature to suit your individual needs.

The boiler has an aesthetically pleasing design and is suitable for installation in a variety of spaces, both in small bathrooms and larger kitchens.

ELECTRIC BOILERS TAILORED TO YOUR NEEDS

JSM series electric boilers were developed in cooperation with leading representatives of the installation industry in Poland. They are perfectly adapted to the specifics of our market. Installation is extremely easy and efficient, which makes them extremely convenient for installers. In addition, their elegant external appearance is a significant asset, appreciated by our customers.
